Subject: RE: Long-range airborne transport of PFOA

I know of no one at the EPA working in this area. The last people to do this were DuPont researchers nearby the PFOA plant in Parkersburg, WV that contaminated the groundwater across the Ohio river. The papers written about it implicate NH4-PFOA as mobile and the likely cause of the contamination of drinking water wells in Little Hocking OH and the neighboring towns. If you need more let me know. I have the papers on this topic.

Subject: Long-range airborne transport of PFOA

I got a call from Dan Costa inquiring if we had anyone working in this area. I told him that I didn't think so but that I would check with others who might know better. Let me know if you or if anyone you know is doing work in this area.

Tim
